	Well was drilled in very close proximity to front property line/ edge of road right-of-way. Property lines/ edge of road right-way was not marked and well could not be verified to be on the property and out of road R/W. Grout was witnessed by EHS and was satisfactory, however well cannot be approved until front property line is surveyed. Property owner and well driller were notified. When front property line is surveyed, well grouting can be approved, well head can be inspected, and water samples can be collected.
